Claims 1-15 are pending.

## Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

 Claims 1-10, 15, drawn to a shutter on a disc cartridge, classified in class 360, subclass 133.

II. Claims 11-14, drawn to a method/device for making the shutter, classified in class72, subclass 337.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, such as not requiring the sequential steps of "preparing upper and lower stamping dies" and "supplying a metal plate material".

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
